BHGE VideoProbes

FOR REMOTE VISUAL INSPECTION.

Superior imaging in a powerful, portable, easy-to-use device.

Put the power of Remote Visual Inspection to work for you.

BHGE's VideoProbes offer superior image quality for a wide range of industries and budgets.

Visual inspections are crucial to reduce the risk of harmful equipment failures and improve uptime. A portable video borescope is an invaluable tool because it lets you perform these inspections quickly, easily, and cost-effectively.

How do you choose the right portable video borescope? Our industrial partners tell us again and again that image quality is their clear number one priority. Better image quality enables you to see what you need to see faster, making inspections more accurate and efficient.

BHGE VideoProbes deliver superior image quality so you can be confident you are getting the most precise inspection results.

Mentor Visual iQ leads the industry with TrueSight™ imaging for cutting-edge HD image quality. And with the arrival of our new XL Flex and XL Detect, you no longer have to compromise on image quality to fit your budget.

Lightweight size makes them truly portable. Low cost of ownership makes them a wise investment. And global support from BHGE gives you peace of mind.
