

>>> DIGITAL PIT GAUGE

Introduction:

This digital pit gauge, designed based on digital vernier caliper with direct reading, is easy to use and provides fast and accurate measurements of surface pits, gauges, dents, undercuts, etc.

Features:

1. It is made in hardened stainless steel and its 0.2" (0.5mm) probe diameter will access even the smallest pits.
2. The data output interface makes it possible to connect with a PC or data logger for collecting and analyzing measurements.
3. E-DGP-2 is equipped with a IP54 protective module for protection from water-spray, dusts and oil.

TECHNICAL DATA:

Model Code	BE-DPG-2
Protection level	IP54
Resolution (mm/in.)	0.01/0.0004
Range (mm/in.)	30/1.25
Permissible Error (mm/in.)	$\pm 0.03/\pm 0.001$
Probe Diameter (mm)	0.5/0.2
MM/IN. Conversion	YES
ON/OFF Function	YES
Zero Setting at any position	YES
Data Output	Available
Measuring Speed	$\leq 1.5\text{m/sec}$
Working Temperature	0~40°C
Relative Humidity	$\leq 80\%$
Storage Temperature	-10~+60°C
Accessories	Button Battery 1.55V
