

## PIT gage

The pit gage is a manual system used to measure surface variations. Its accuracy, ease of use, and modular design make it an essential tool for manual pit inspection.

### PIT GAGE FEATURES

- + Lightweight aluminum construction with a wear resistant coating.
- + Precision ball and socket locating system for extension arms.
- + Digital indicator with selectable inch or metric units, and zero setting function.
- + 20,000 hr battery life.

### PIT GAGE KIT

- 3" base with digital indicator
- Blind side base (indicator can be transferred from 3" base)
- Extra contact point and wrench
- Rugged plastic carrying case
- 6" extension arms
- Optional reverse spring indicator gage (requires operator finger movement to attain reading)

### ORDERING CODE INFORMATION

- PGK20 
- A = Optional reverse spring indicator gage (see Figure 1)
  - 2 = 2 extension arms
  - 4 = 4 extension arms
  - 6 = 6 extension arms
