

# Installing SJ210 Freeware Software

Surspak	Freeware
Author/Date:	Mack Elmishad - 5/4/2011

## 1.0 Introduction

2.0 The following article explains how to install the downloaded SJ210 freeware into your PC.

Please note that this software is comparable with both window-XP and window7 32 bit only and it is not supported under 64 bit window version.

## 3.0 Overview

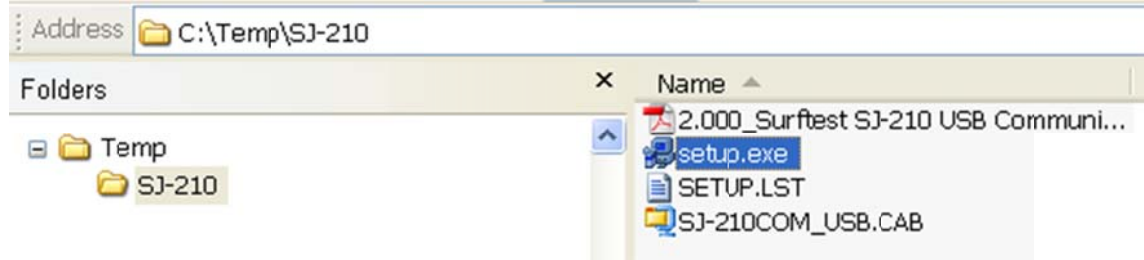

The freeware software allows communication between the surface tester (SJ210) and your PC using simple GUI.

## 4.0 Procedure

- 4.1 Locate the downloaded file and extract its contents to a folder.
- 4.2 A windows Security message may or may not appear.
- 4.3 Select run to continue.

4.4 Browse to the extracted folder named "SJ210" and execute the file "Setup.EXE".

4.5 Click OK to continue.

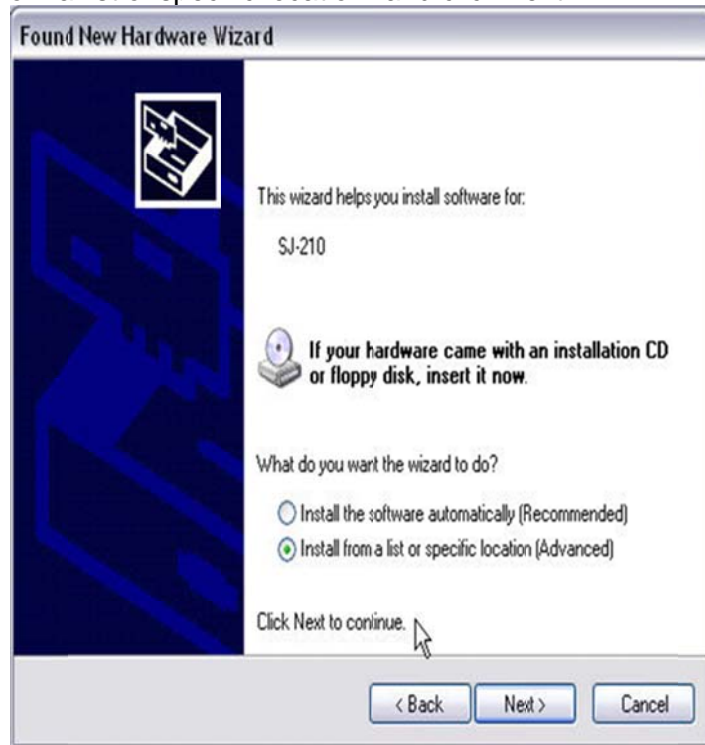

4.6 Click the pc picture button to start the installation.

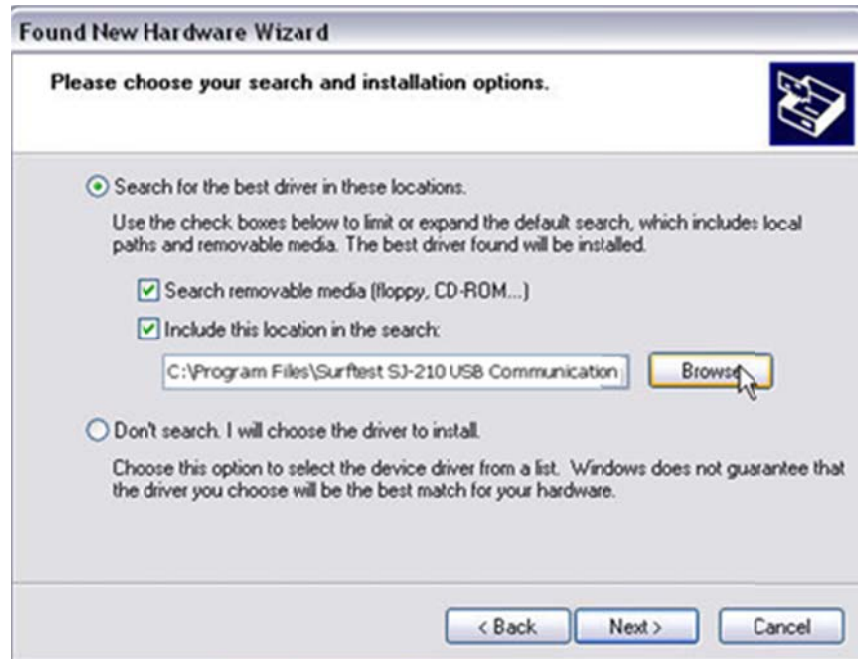

4.7 Click [Continue]

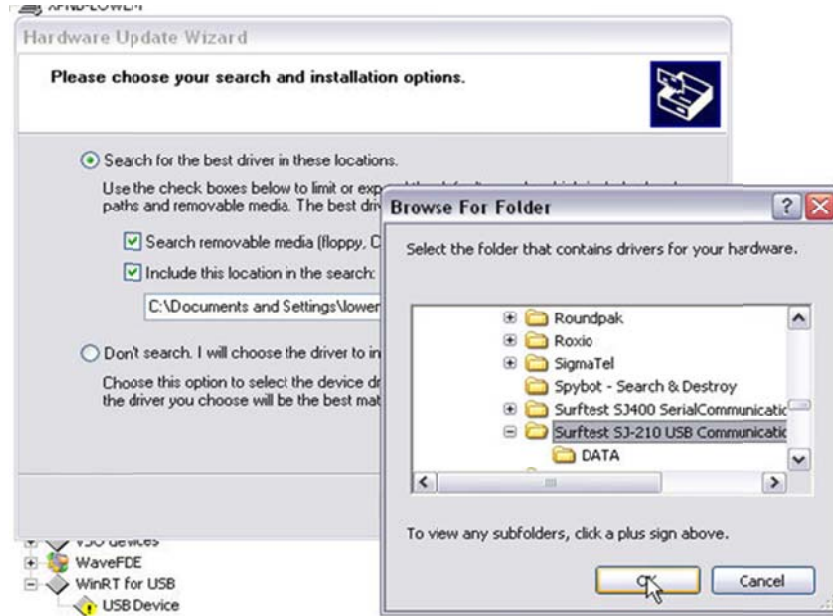

- 4.8 After installation completes power on the SJ-210 and connect to PC via USB cable.
- 4.9 At this time a found new hardware wizard should appear.
- 4.10 Select "Install from a list of specific location" and click next.

- 4.11 Be sure to check "Include this location in the search" and select the browse button.

- 4.12 Navigate to C:\Program Files\Surftest SJ-210 USB Communication folder and click OK

- 4.13 Select [Next] to complete the driver installation.
