

EVOLUTION OF TRAMEX RH TESTING SYSTEM

2008

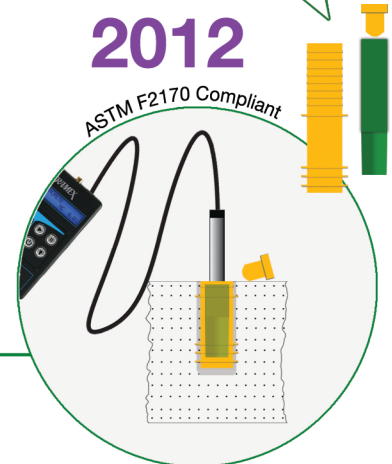

2010

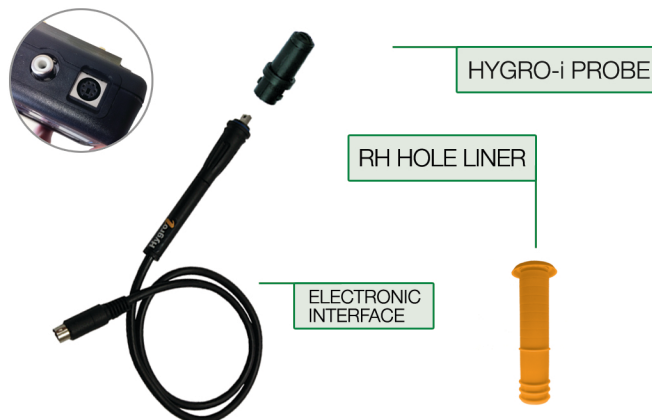

For ASTM F2170-11 Compliance older RH probes must be used with the new Hole Liner sleeve.

2012

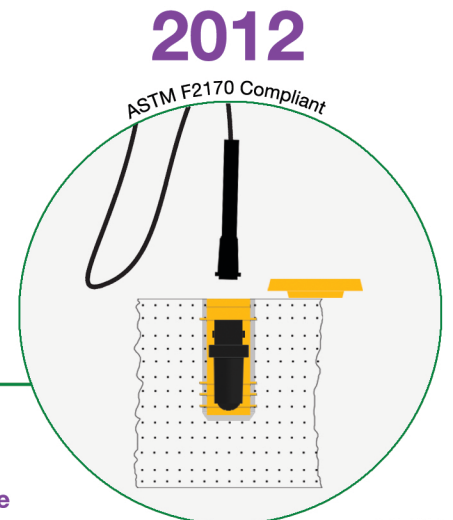

RH sleeve order code: RHSK12, RHSK 50, RHSK100

NEW Hygro*i*

2012

RH Sleeve Order Code: RHHL12, RHHL 50, RHHL100

The Hygro-i RH testing system is the most advanced, reliable and cost efficient method of RH testing of the sub-floor (as well as ambient conditions) available. Used in conjunction with the Tramex CMEX2 or MRH3 non-destructive moisture meters the Hygro-i probe provides measurements of humidity, temperature and dew-point in structural materials such as concrete flooring, walls etc.
